Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 7 is objected to because of the following informalities: line 2, it appears that "prove" should be --probe--. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 9-11, and 13-15 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 0 851 064 to Canteri. Canteri discloses the injection of polymeric resin into a volume of loose granular material such as sand, soil, or silt.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2-7, 12, and 16-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 0 851 064 to Canteri in view of Goughnour #5,279,502. Both Canteri and Goughnour disclose the strengthening of soils by increasing the load bearing capacity for building foundations or the like. Canteri discloses all that is claimed except for placing granular material in the hole and agitating the granular material.

Art Unit: 3673

Goughnour discloses the placement of stone, gravel or sand to form a column or pile in order to stabilize the soil, see col. 1, lines 15-23. Goughnour also discloses the use of vibrators and/or compactors to allow agitating of the granular material. It would have been obvious to one of ordinary skill in the art to fill a hole with sand, stone or gravel, and to agitate such material, since doing so facilitate construction of a column/pile which allows for the stabilization of soil. Depending on the distance of the piles, it is capable to make a barrier wall. Furthermore, it appears that such piles may be formed in various soils including permafrost type soils.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
